FORM 6

Infection Control

HCS staff shall observe the following procedures in the provision of services to prevent exposure to infectious disease. These procedures are universal precautions to prevent the spread of infectious diseases in compliance with Occupational Safety and Health Administration requirements (OSHA) and state regulations for home care providers. All blood and body fluids with blood are to be treated as potentially infectious. General rule of thumb is hand washing before and after attending to client. Wash hands and other skin surfaces immediately and thoroughly if soiled with blood or body fluids, and change gloves after contact with each client. Wash hands before and after giving care to clients. The administrator is responsible for ensuring that infection control is practiced.

Wear latex gloves when:

- Touching blood/body fluids, mucous membranes, or non-intact skin.
- Handling items or surfaces soiled with blood/body fluids visible with blood.
- Performing venipuncture and other vascular access procedures.
- Cleaning and decontaminating spills of blood/body fluids.
- Although no diseases are known to be spread by direct skin contact with feces or other body fluids, gloves should be worn when having contact with feces and any body fluids as a basic hygiene measure.

Standard housekeeping cleaning procedures to be used:

- For spills of blood and body fluids, wipe up spill with soap and water and then disinfect area with a commonly used germicide or freshly prepared 1:10 bleach solution (1 part bleach to 10 parts water).
- All soiled linen should be bagged at the location where it was used; it should not be sorted or rinsed in client-care areas. Linen soiled with blood or body fluids should be placed and transported in bags that prevent leakage.
- Linens and personal clothing items laundered should be washed using routine laundering procedures.
- Dish washing using routine cleaning procedures effectively destroys pathogenic (disease causing) organisms. Dishes of clients with hepatitis B or AIDS do not need to be separated from the rest of the facility clients. Do not share unwashed utensils or use common drinking glasses with any client.

Environmental procedures to be used:

- Use a gown or apron during procedures that are likely to generate splashes of blood or other body fluids. Universal precautions also recommend the use of masks/eye wear during procedures that are likely to generate droplets of blood or other body fluids to prevent exposure of the mucous membrane of the mouth and nose/eyes.
- Dispose of secretions directly into the toilet. An individual toilet for a client is not required, but is recommended if the person has diarrhea.
- Care should be taken to prevent injuries caused by needles and other sharp instruments or devices.
- To prevent needle stick injuries, needles should not be recapped, purposely bent or broken by hand, removed from disposable syringes, or otherwise manipulated by hand. After they are used, disposable syringes and needles, and other sharp items should be placed in puncture-resistant containers for disposal. The puncture-resistant containers should be located as close as practical to the use area.
- Direct mouth-to-mouth contact is not recommended. It is recommended that mouthpieces, ventilation bags or other ventilation devices be kept in areas where the need is predictable. However, if such devices are not available an employee should not hesitate to provide CPR (Cardiopulmonary Resuscitation) procedures.

I AM CPR & TB CERTIFIED. I WILL REPORT TO HOME CARE SOLUTIONS ANY EXPOSURE TO TB & HEPATITIS B, WHETHER THE EXPOSURE OCCURRED ON OR OFF THE JOB. I SHALL REPORT THE EXPOSURE IMMEDIATELY WHEN I BECOME AWARE OF IT.

Form **W-4**

Department of the Treasury

Employee's Withholding Certificate

Complete Form W-4 so that your employer can withhold the correct federal income tax from your pay.
Give Form W-4 to your employer.
Your withholding is subject to review by the IRS.

OMB No. 1545-0074

2026

Step 1: Enter Personal Information

(a) First name and middle initial	Last name	(b) Social security number
Address		**Does your name match the name on your social security card?** If not, to ensure you get credit for your earnings, contact SSA at 800-772-1213 or go to *www.ssa.gov*.
City or town, state, and ZIP code		

(c) ☐ **Single** or **Married filing separately**
☐ **Married filing jointly** or **Qualifying surviving spouse**
☐ **Head of household** (Check only if you're unmarried and pay more than half the costs of keeping up a home for yourself and a qualifying individual.)

Caution: To claim certain credits or deductions on your tax return, you (and/or your spouse if married filing jointly) are required to have a social security number valid for employment. See page 2 for more information.

TIP: Consider using the estimator at *www.irs.gov/W4App* to determine the most accurate withholding for the rest of the year if you: are completing this form after the beginning of the year; expect to work only part of the year; or have changes during the year in your marital status, number of jobs for you (and/or your spouse if married filing jointly), dependents, other income (not from jobs), deductions, or credits. Have your most recent pay stub(s) from this year available when using the estimator. At the beginning of next year, use the estimator again to recheck your withholding.

Complete Steps 2–4 ONLY if they apply to you; otherwise, skip to Step 5. See page 2 for more information on each step, who can claim exemption from withholding, and when to use the estimator at *www.irs.gov/W4App*.

Step 2: Multiple Jobs or Spouse Works

Complete this step if you (1) hold more than one job at a time, or (2) are married filing jointly and your spouse also works. The correct amount of withholding depends on income earned from all of these jobs.

Do **only one** of the following.

(a) Use the estimator at *www.irs.gov/W4App* for the most accurate withholding for this step (and Steps 3–4). If you or your spouse have self-employment income, use this option; **or**

(b) Use the Multiple Jobs Worksheet on page 3 and enter the result in Step 4(c) below; **or**

(c) If there are only two jobs total, you may check this box. Do the same on Form W-4 for the other job. This option is generally more accurate than Step 2(b) if pay at the lower paying job is more than half of the pay at the higher paying job. Otherwise, Step 2(b) is more accurate . . . . . ☐

Complete Steps 3–4(b) on Form W-4 for only ONE of these jobs. Leave those steps blank for the other jobs. (Your withholding will be most accurate if you complete Steps 3–4(b) on the Form W-4 for the highest paying job.)

Step 3: Claim Dependent and Other Credits

If your total income will be $200,000 or less ($400,000 or less if married filing jointly):

(a) Multiply the number of qualifying children under age 17 by $2,200 . . . . . **3(a)** $

(b) Multiply the number of other dependents by $500 . . . **3(b)** $

Add the amounts from Steps 3(a) and 3(b), plus the amount for other credits. Enter the total here . . . . . **3** $

Step 4: Other Adjustments

(a) Other income (not from jobs). If you want tax withheld for other income you expect this year that won't have withholding, enter the amount of other income here. This may include interest, dividends, and retirement income . . . . . **4(a)** $

(b) Deductions. Use the Deductions Worksheet on page 4 to determine the amount of deductions you may claim, which will reduce your withholding. (If you skip this line, your withholding will be based on the standard deduction.) Enter the result here . . **4(b)** $

(c) Extra withholding. Enter any additional tax you want withheld each **pay period** . . **4(c)** $

Exempt from withholding
